

§ 930.34

15 CFR Ch. IX (1–1–13 Edition)

agency shall provide for public participation under section 306(d)(14) of the Act when reviewing the Federal agency's *de minimis* activity request. If the State agency objects to the Federal agency's *de minimis* finding then the Federal agency must provide the State agency with either a negative determination or a consistency determination pursuant to this subpart. OCRM is available to facilitate a Federal agency's request.

(ii) *De minimis* activities are activities that are expected to have insignificant direct or indirect (cumulative and secondary) coastal effects and which the State agency concurs are *de minimis*.

(4) *Environmentally beneficial activities*. The State agency and Federal agencies may agree to exclude environmentally beneficial Federal agency activities (either on a case-by-case basis or for a category of activities) from further State agency consistency review. Environmentally beneficial activity means an activity that protects, preserves, or restores the natural resources of the coastal zone. The State agency shall provide for public participation under section 306(d)(14) of the Act for the State agency's consideration of whether to exclude environmentally beneficial activities.

(5) General consistency determinations, phased consistency determinations, and national or regional consistency determinations under § 930.36 are also available to facilitate federal-State coordination.

(b) Federal agencies shall consider all development projects within the coastal zone to be activities affecting any coastal use or resource. All other types of activities within the coastal zone are subject to Federal agency review to determine whether they affect any coastal use or resource.

(c) Federal agency activities and development projects outside of the coastal zone, are subject to Federal agency review to determine whether they affect any coastal use or resource.

(d) Federal agencies shall broadly construe the effects test to provide State agencies with a consistency determination under § 930.34 and not a negative determination under § 930.35 or other determinations of no effects.

Early coordination and cooperation between a Federal agency and the State agency can enable the parties to focus their efforts on particular Federal agency activities of concern to the State agency.

§ 930.34 Federal and State agency coordination.

(a)(1) Federal agencies shall provide State agencies with consistency determinations for all Federal agency activities affecting any coastal use or resource. To facilitate State agency review, Federal agencies should coordinate with the State agency prior to providing the determination.

(2) *Use of existing procedures*. Federal agencies are encouraged to coordinate and consult with State agencies through use of existing procedures in order to avoid waste, duplication of effort, and to reduce Federal and State agency administrative burdens. Where necessary, these existing procedures should be modified to facilitate coordination and consultation under the Act.

(b) *Listed activities*. State agencies are strongly encouraged to list in their management programs Federal agency activities which, in the opinion of the State agency, will have reasonably foreseeable coastal effects and therefore, may require a Federal agency consistency determination. Listed Federal agency activities shall be described in terms of the specific type of activity involved (e.g., federal reclamation projects). In the event the State agency chooses to describe Federal agency activities that occur outside of the coastal zone, which the State agency believes will have reasonably foreseeable coastal effects, it shall also describe the geographic location of such activities (e.g., reclamation projects in coastal floodplains).

(c) *Unlisted activities*. State agencies should monitor unlisted Federal agency activities (e.g., by use of intergovernmental review process established pursuant to E.O. 12372, review of NEPA documents, and the FEDERAL REGISTER) and should notify Federal agencies of unlisted Federal agency activities which Federal agencies have not subjected to a consistency review but which, in the opinion of the State

agency, will have reasonably foreseeable coastal effects and therefore, may require a Federal agency consistency determination. The provisions in paragraphs (b) and (c) of this section are recommended rather than mandatory procedures for facilitating federal-State coordination of Federal agency activities which affect any coastal use or resource. State agency notification to the Federal agency (by listed or unlisted notification) is neither a substitute for nor does it eliminate Federal agency responsibility to comply with the consistency requirement, and to provide State agencies with consistency determinations for all development projects in the coastal zone and for all other Federal agency activities which the Federal agency finds affect any coastal use or resource, regardless of whether the State agency has listed the activity or notified the Federal agency through case-by-case monitoring.

(d) *State guidance and assistance to Federal agencies.* As a preliminary matter, a decision that a Federal agency activity affects any coastal use or resource should lead to early consultation with the State agency (*i.e.*, before the required 90-day period). Federal agencies should obtain the views and assistance of the State agency regarding the means for determining that the proposed activity will be conducted in a manner consistent to the maximum extent practicable with the enforceable policies of a management program. As part of its assistance efforts, the State agency shall make available for public inspection copies of the management program document. Upon request by the Federal agency, the State agency shall identify any enforceable policies applicable to the proposed activity based upon the information provided to the State agency at the time of the request.

§ 930.35 Negative determinations for proposed activities.

(a) If a Federal agency determines that there will not be coastal effects, then the Federal agency shall provide the State agencies with a negative determination for a Federal agency activity:

(1) Identified by a State agency on its list, as described in § 930.34(b), or through case-by-case monitoring of unlisted activities; or

(2) Which is the same as or is similar to activities for which consistency determinations have been prepared in the past; or

(3) For which the Federal agency undertook a thorough consistency assessment and developed initial findings on the coastal effects of the activity.

(b) *Content of a negative determination.* A negative determination may be submitted to State agencies in any written form so long as it contains a brief description of the activity, the activity's location and the basis for the Federal agency's determination that the activity will not affect any coastal use or resource. In determining effects, Federal agencies shall follow § 930.33(a)(1), including an evaluation of the relevant enforceable policies of a management program and include the evaluation in the negative determination. The level of detail in the Federal agency's analysis may vary depending on the scope and complexity of the activity and issues raised by the State agency, but shall be sufficient for the State agency to evaluate whether coastal effects are reasonably foreseeable.

(c) A negative determination under paragraph (a) of this section shall be provided to the State agency at least 90 days before final approval of the activity, unless both the Federal agency and the State agency agree to an alternative notification schedule. A State agency is not obligated to respond to a negative determination. If a State agency does not respond to a Federal agency's negative determination within 60 days, State agency concurrence with the negative determination shall be presumed. State agency concurrence shall not be presumed in cases where the State agency, within the 60-day period, requests an extension of time to review the matter. Federal agencies shall approve one request for an extension period of 15 days or less. If a State agency objects to a negative determination, asserting that coastal effects are reasonably foreseeable, the Federal agency shall consider submitting a consistency determination to the State
